**ULTRA LOW
SULFUR FUEL
ONLY**

RE529956

As of January 2011, U.S. EPA regulations require the application of a permanently applied label near the fuel tank fill port for diesel driven equipment. This label is to state:

ULTRA LOW SULFUR FUEL ONLY

Northern Lights is providing this label for application to the fuel inlet of the fuel supply tank for each engine or generator set. This is to be applied by the installer of the engine or gen set, or by the manufacturer of the equipment that the engine or gen set is installed in. The location of the label must be in clear site of personnel that refill the supply tank.

MODEL DESIGNATION

MODELS INCLUDED

This manual covers the parts and components used in:

L844D, M844W3, M844LW3, M20CRW3, NL844W3, and NL844LW3.

Model Numbers

Model numbers give the unit's application, block model, aspiration, and RPM:

L 844D = Lugger Propulsion engine with an 844 base engine, Tier III.

M 844W3 = Northern Lights marine diesel generator set with an 844 engine and a generator with a special winding, Tier III.

M 844LW3 = Northern Lights marine diesel generator with an 844 engine, long stroke, special winding generator, Tier III.

M 20CRW3 = Northern Lights 20 kW commercial grade marine diesel generator with a generator with a special winding, Tier III.

NL 844LW3 = Northern Lights industrial diesel generator set with an 844L engine and a radiator, Tier III.

Serial Numbers

Your set has three serial numbers: ① an engine number stamped on the block, ② a generator plate and, ③ a generator set plate. Use the serial number on the **generator set plate** when ordering parts or in correspondence. The generator set plate is found on the service side of the generator and resembles the drawings below.
